

Engineering Manager – Plano, Texas

Engineering Manager position in Plano, TX, United States

Parsec Technologies, Inc. is a fast growing, U.S. based antenna company designing and developing next generation industrial antenna solutions for the Internet of Things. Parsec is now hiring an Engineering Manager who will be responsible for managing all engineering functions between engineering related groups. Responsibilities include managing antenna designs, mechanical designs, prototype builds, test, product inspection and any and all engineering areas related to the business. You must have exceptional communication, organization and documentation skills as well as the ability to thrive in a fast paced environment. You will work closely and hands on with other engineers and lab personnel. You will be expected to set priorities, report progress, and execute the schedule on time. We offer an excellent working environment with a mix of genuine hands on electronic laboratory testing and product development. This exciting role will offer the opportunity to work with our top industry leading RF and electrical engineering hardware design professionals.

Skill Requirements:

- Must have a minimum of five years' experience directly managing a team of engineers.
- Exemplary management, communication and organization skills required.
- Hands on is a must.
- Must have some antenna related experience. Including experience using a variety of equipment such as anechoic chambers, network analyzers, and other RF test equipment.
- Must have experience with system level specifications for LTE/Wi-Fi/GPS and LoRa, including corresponding experience with regulatory requirements and processes for wireless devices, including FCC, PTCRB, CTIA, etc.
- Experience with OTA performance testing is preferred.
- Travel to customer sites and trade shows around the U.S. is a must.

Education: Bachelors in Electrical Engineering a must. Masters or equivalent experience preferred.

About Plano, Texas:

Plano is located just north of Dallas, Texas and an hour east of Ft. Worth. The region offers a great cost of living combined with a robust economy and a pleasant climate.

This North Texas region of Texas is a great place to live and to raise a family. The region is home to numerous colleges and universities which include the University of Texas at Dallas. The population is diverse with engineers and technology companies. With residents hailing from a variety of backgrounds. The area is centrally located in the United States allowing for shorter flight times to customers and partners.
