

VP of RF Engineering - Antennas

VP of RF Engineering

Location: Plano, TX, United States

Parsec Technologies, Inc. is a fast growing, U.S. based antenna company delivering next generation industrial antenna solutions for the Internet of Things. Parsec is now hiring a VP of RF Engineering who will be responsible for managing all engineering functions between engineering related groups. Responsibilities include managing design, mechanical, prototyping, assembly, test, product inspection and any and all engineering areas related to the business. This role requires results oriented leadership with a proven track record, expert knowledge and technical leadership in RF hardware engineering.

Specific Key Responsibilities:

- Responsible for the quality and technical approach taken by team members, ensuring it is in line with the business goals and strategy and those projects are delivered on time and on budget.
- Responsible for driving process improvement, while maintaining high quality design, test and manufacture parameters.
- Creating and maintaining a professional culture within the team, where individuals take ownership and are proud of delivering excellence and quality.
- Ability to communicate beyond the lab environment into customer engagement and business development.

Specific Job Requirements:

Candidates must have prior multi-year experience in a senior position responsible for design, build and delivery of RF hardware, systems, services and products. Candidates must possess a minimum of 10 years of experience in an engineering leadership position.

- Deep understanding of RF engineering and antenna performance parameters.
- Exceptional communication, organization and documentation skills
- Candidate must have direct experience leading teams through prototyping, testing, and volume assembly of RF hardware.
- Must have antenna related experience. Including experience using a variety of equipment such as anechoic chambers, network analyzers, and other RF test equipment.

General attributes:

- Passion for quality, market competitive cost and speed of delivery

- Strong integrity and accountability
- Strong team player and ability to build effective relationships

Education:

- Bachelors or master's degree in hardware engineering related field a must.

Language:

- Fluent in written and spoken English.

Offering:

Parsec Technologies, Inc. is offering a competitive salary, yearly bonus and stock options. Medical, dental and vision insurance premiums for employees and dependents paid 100% by Parsec. PTO: Three weeks paid vacation plus one week sick time.

EEO Statement All qualified applicants to Parsec Technologies, Inc. will receive consideration for employment without regard to race, religion, color, sex, age, disability or any other characteristic protected by law.
