

PRODUCT SPOTLIGHT: BUS NETWORK SOLUTIONS

The new market for K-12 school bus Wi-Fi requires the best coverage possible. School buses are the new mobile hotspot for multiple scenarios:

- A true mobile hotspot while kids are commuting to and from school.
- A portable mobile hot spot while parked in an apartment complex.
- A temporary mobile hotspot parked in a parking lot of public area for daily use.

All of these applications require a superior coverage area;
Why not use the #1 performance leader?

Parsec's antennas give you the highest level of performance even in remote areas.

When performance counts, go with the best!

Hundreds of school systems across the country have relied on Parsec antennas since the pandemic started. Temporary pole mount or permanent mounting options are available.
