

STREAMLINED HIGH PERFORMANCE ANTENNA!

Akita Lite

Our rugged Akita Lite series antennas are designed to optimize performance of 600 MHz to 6 GHz and C-Band frequencies for IoT and enterprise network solutions. The Akita Lite is the same exact antenna as the Akita but now with ultra-low loss, lightweight and more flexible LSR200 cables for a more cost-effective network solution and easy installation. This IP54 rated antenna can be mounted indoor, outdoor, pole mounted, or wall mounted to perform at high efficiency for retail, warehouse, office, RVs, and residential homes.

Ships in 2-3 days!

Versatile Design

The high end steel clamps of the Akita Lite antenna allow for easy installation to any pole that has a diameter of 2.5 - 3.5 inches. The Akita Lite also comes with screws to allow it to be wall or panel mounted. The hard rugged radome keeps any unwanted water, oil, or other contaminants from affecting the antenna elements. Parsec's external antennas are rugged antennas that won't buckle under the pressure!

Steel Pole Clamps
Fits on Poles with
2.5 - 3.5 inch diameters

Fantastic for Any Industry

The Akita Lite features a 4x4 MIMO cellular, omni-directional antenna that supports 5G frequencies with its high efficiency and high gain. This antenna can also include GPS, perfect for IoT applications. Why settle for less for your cellular solution? Find out yourself why the Akita Lite is loved and trusted by our customers for its high performance.
