

C-BAND

DISTANCE & COVERAGE

Chinook

Chow

Chinook & Chow

The Chinook and Chow antennas are designed to optimize performance of 600 MHz to 6 GHz and C-Band frequencies for IoT and enterprise network solutions. These IP54 rated antennas can be mounted indoor, outdoor, pole mounted, or wall mounted to perform at high efficiency and off 4G and 5G C-Band based network solutions.

Ships in 2-3 days!

Chinook

The Chinook PRO Series antenna is a 5G, 4X4 MIMO cellular, omni-directional antenna. The difference between our best seller, the Akita, and its kennel mate, the Chinook, is an additional antenna element to make the C-band frequency reach further distance to achieve higher gain. This PRO series antenna performs at high efficiency that is perfect for campus, enterprise, retail, and warehouse applications.

Chow

The Chow PTA series antenna is a 5G, 2X2 MIMO cellular, omni-directional antenna optimized for C-Band to provide excellent efficiency in a minimalistic design. This high-performance antenna is perfect for future proofing any factory automation, IoT application, retail, or enterprise.
