

MOST PORTABLE 5G CASE ANTENNA!

BOXER

The most compact 5G network deployment is at your fingertips with the Boxer case antenna! With patented RightPath Signal Technology™ each antenna element installed into the lid provides the highest performance with no set up required. Designed to operate closed, you can protect your private, on-the-go network from anywhere. Ideal for pop-up retail, travel, SMB, maintenance fleets, school buses, polling stations, and so much more.

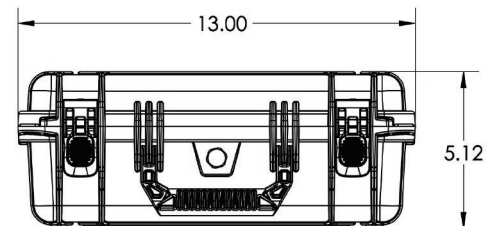

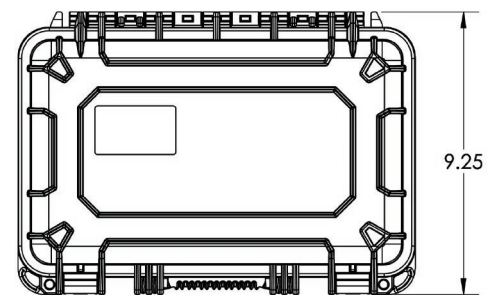

Travel Friendly Case

The Boxer 5G case antenna is our most portable 5G case developed with the user in mind. Compact enough to fit in a backpack, the Boxer is the perfect-sized travel companion for on-call maintenance fleets, pop-up retail, network testing, and public safety. It's ruggedized design features antennas built into the lid of an IP67 rated case and includes metal plates to secure your router and battery to protect your network hardware.

Easy Deployment

The ultimate 9:1 5G deployment made with rugged materials such as impact resistant resin to reduce damage. The embedded antennas eliminate the need for on-site assembly and potential user error during deployment. Simple connections include a USB-C connector, 2 RJ-45 connectors, vents, and a fan with sealable ports.
