

Antenna Selection Guide

Inseego Wavemaker™
FX4100

Inseego Wavemaker™
FX4100

The FX4100 stands out as the first T-Mobile router to support 5G Standalone (SA) technology.

5G SA is built entirely on 5G offering improved speed and capacity.

For businesses that require consistent, high-speed internet access, pair the FX 4100 with a Parsec Antenna:

Falcon

Labrador

Great Dane

Good

The Falcon antenna is a 5G cellular omni-directional, window / wall mount or desktop stand mount antenna. Simple set up and a low price get you going if you need a little help with getting a signal at your location.

Indoor use only

Cellular connectivity

Distance from cell tower:

Up to 5 miles

Better

A minimalistic aesthetic appearance and small footprint makes the Labrador a perfect addition to any home, retail or office space. Indoor / outdoor compatibility and high gain make this an all-around great antenna choice.

Indoor or outdoor use

Cellular connectivity

Distance from cell tower:

10 to 15 miles

Outdoor Pole Mount

Fixed outdoor mount for high omni-directional gain in difficult scenarios.

Outdoor use only

Cellular connectivity

Distance from cell tower:

15 + miles
